

*A  
3-D Model  
of the  
Kirsse  
Wilton*

**Instructions**  
1. cut along solid lines  
2. fold along dotted lines

***Kirsse Wilton***  
noun [kurs - e wilt' n ]

*habitat:* Northeast United States  
*diet:* BBQ Ribs, Whole Grains & Rainbows  
*characteristics:* Cute, Cuddly & Sarcastic

The Kirsse Wilton is a hybrid mammal, first theorized by biologists in the Spring of 2005. It is believed to combine the better traits of two other creatures Kirsten Sorton and Jesse Willmon. While it has never been photographed in the wild, many biologists believe that the fall of 2008 will provide this elusive creature with optimal conditions to make itself known.
